p. 6, 7	Anchor bands

Thailand, the first natural rubber exporter, 95% of this volume comes from family farms of less than 8 ha

Standard® natural rubber bands

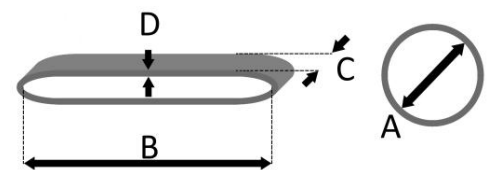

Features and benefits

- 80% rubber content. This high rubber content makes it the best value for money and an excellent count per kilo
- Clean finish for a more comfortable use, pleasant touch, dust-free
- Recommended for quick application and repeated use
- Elongation up to 650% / breaking strength 40N per 1mm²
- Custom manufacturing from 15 to 420 mm in length

Coloured rubber bands

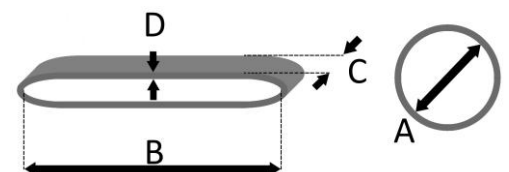

Features and benefits

- 60% rubber content
- For industrial applications where a strong elastic with superior tensile strength is required
- Tying cut flowers
- Identification purposes in industry and horticulture
- Available from stock in black colour with UV resistance - quality developed for the horticulture sector
- Elongation up to 620% / Breaking strength 20N per 1mm²
- Special production: light blue, navy blue, mauve, pastel green, dark green, pastel red, dark red, pink, light brown, dark brown, orange, yellow, grey and black

Standard® rubber bands for the retail market

Features and benefits

- 60% rubber content
- Gloss finish, bright colours
- Can be produced with customers own header labels
- Selection of attractive colors and dimensions most commonly used for everyday applications
- Ideal for home, school or office use

Finger cones

Features and benefits

- Superior quality, good life expectancy
- Easy to use thanks to well-defined pins
- For assembly work in office and industry

A	Stock list

Single line printed rubber bands

Features and benefits

Minimum order quantities 5000 pieces, and quick production time

Up to 3 colour print, clear and efficient

Perfect for promoting special offers, advertising, events, exhibition hands-outs, packaging promotions, gift wraps

Your choice of 13 background colours from our range: white, black, dark or light pink, red, dark or light blue, orange, dark or light yellow, purple, light or dark green

Continuous printed rubber bands

Features and benefits

One colour print

Available colours: Light blue, navy blue, mauve, pastel green, dark green, pastel red, dark red, pink, light brown, dark brown, orange, yellow, grey and black

Product identification in horticulture and industry

Coloured synthetic elastic bands

Features and benefits

Latex free and UV-resistant

A selection of 13 vibrant colours available, including fluorescent shades and transparent effect

Low minimum production quantity required with short lead times

High U.V. resistance EPDM rubber bands

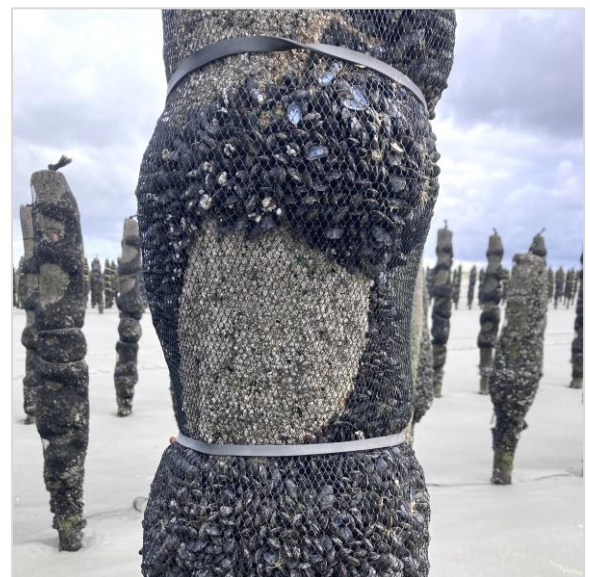

Characteristics

- Vulcanised EPDM synthetic rubber
- Cost efficient – reusable, easy to place and remove with a firm grip
- High UV resistance with outstanding water, steam, heat, oxidation, ozone and outdoor durability
- High strength and elasticity rubber band with high resistance to degradation under normal storage, use and handling conditions

Specific applications

- The high UV resistance bands are used for binding, fastening, grouping, and holding goods in industries, agriculture, aquaculture, and offices
- The EPDM bands are popular in the aquaculture sector for its hard conditions resistance
- To handle and fasten oyster crates, lobster pincers and other crustaceans
- EPDM quality bands perfectly suit outdoor applications where higher durability on use is required
- For long-term storage of documents and files, and other house-related storage applications
- Bind, organise and protect your gear

EPDM Elastic anchor bands with high UV resistance

Characteristics

- Vulcanised EPDM synthetic rubber with an anchor shape tie
- Cost efficient – reusable, easy and quick to place and remove
- High UV resistance with outstanding resistance to water, steam, heat, oxidation and ozone
- Excellent outdoor durability up to 5 years on use
- 300% elasticity

Applications

- Holding tutors and frost covers in vineyards
- Tying and guiding trellised fruit trees
- Accompanies the growth of the plant without strangling or injuring it
- Grouping and holding outdoor tubular devices for irrigation

Coloured elastic anchor bands made from natural rubber

Characteristics

- Natural rubber bands with an anchor shape tie
- High elasticity and sustainability product with polyvalent uses for industries
- Recommended for quick application and repeated uses with a high count per kilo making it the best value for money
- Photodegradable over time for eco-friendly outdoor use
- Available in several colours: natural, yellow, red, blue, green and orange

Applications

- Grouping and holding cables in the automotive industry
- Fastening and identifying electric wires and cables
